ADRIABIKE CYCLING ROUTE: VENICE - KOPER
BIKE + BOAT: BIBIONE- CAORLE

VeGAL, Veneto partner of the INTER BIKE II project will organize the second workshop on 20.09.2018 to test the bike + boat service that will cross the lagoon of Caorle that will connect directly the beach of Bibione with Vallev ecchia di Caorle and then shorten the Adriabike cycle path and make it more fascinating.

The event will start from the Darsena Marina Uno in Lignano, where bicycles will be available and where the Tagliamento river will be crossed by an active ferry from May 2018 until September 30th 2018. You will cycle across Bibione beach and you will arrive at the Baseleghe port where a boat with bicycle transport will lead us to Vallev ecchia di Caorle.

The event is not aimed at the general public but at the invitation. We will invite stakeholders interested in the activation and management of the bike + boat service.

It will involve the partners of the INTER BIKE II project, the municipalities of San Michele al Tagliamento and Caorle, Veneto Agricoltura which manages the Vallev ecchia oasis with the experimental farm. The bicycle business network that was set up during the first edition of INTER BIKE will be involved. It is also foreseen the involvement of specialized operators in the bike + boat service and a tour operator specialized in the organization and marketing of bicycle trips. Finally, it is planned to involve a journalist / photographer to visually document the route.

The event will follow the following program and will take place on 20/9/2018. We have scheduled a postponement in the event of bad weather on 25/9/2018.
