

TRAIN INSIGHTS - Technology park Ljubljana

Unconference, 15.6.2020

Boštjan Čibej, bostjan.cibej@tp-lj.si

Global trends in Biotech

Personalized
medicine

Collaboration
between
companies

Integration
of digital into
Biotech

Optimization
of regulatory
procedures
for drugs

Advances in
genetics and
immunology

Biotech sector in Slovenia

- 27 Biotech companies, SMEs
- They predominantly:
 - Offer products/services to large pharma or medical companies
 - Conduct research through grants
- Greatest needs of entrepreneurs:
 - Networking
 - Human capital
- Fragmentation of R&D and business support services

Response to sector's needs

- Headhunting events
- Workshops, focusing on different healthcare related topics
- Healthday.si yearly conference

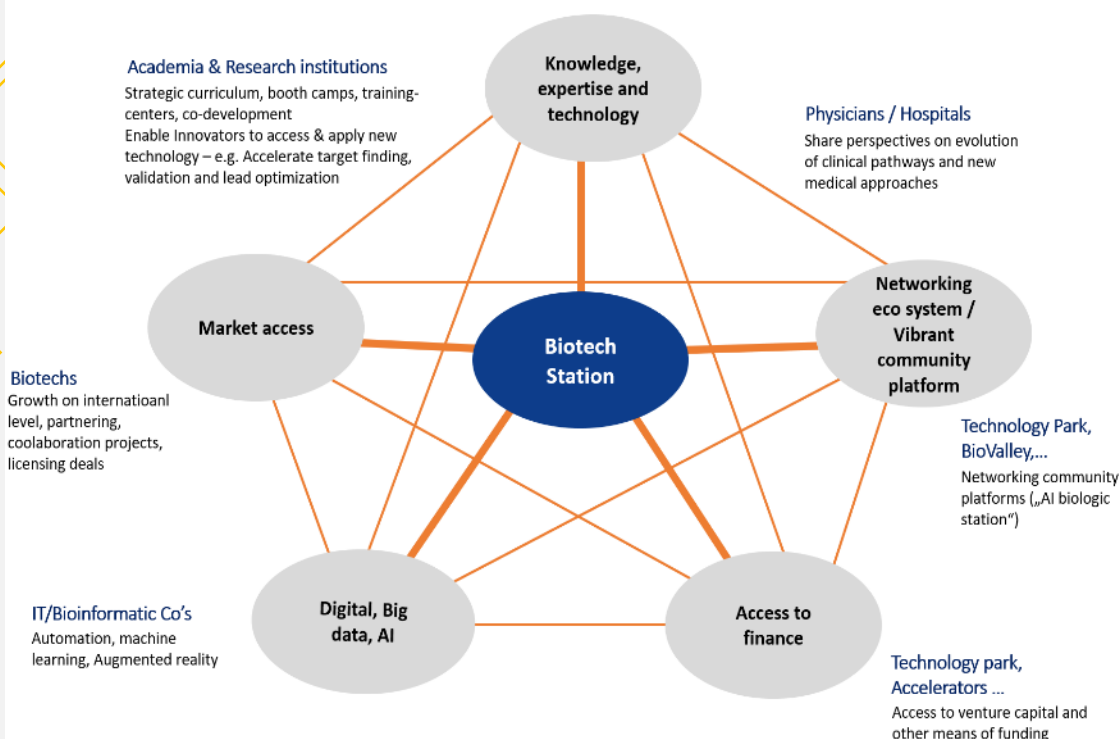

Other tools

- Resource Container, [link](#)
- Biotech Station, [link](#)

Biotech station – Regional Integrated ‘Eco system’ of innovation

BioTech station – specialized vibrant cross-boarder community platform intersection

Biotech station concept will be **built on the current infrastructure & activities** already provided by project partners (ie. BioHighTech NET, Healthday.si, ...)

Biotech station **will enable focus end targeted networking** within the biotech eco system starting with activities across Slovenia and FVD region, Italy with the opportunity to develop and provide a networking platform in the broader Alpe/Adria and EU space in the future

Approach TBD... ie. platform format, events...

2 Virtual Reality simulations

- Drug development
- Detection of food bacteria

- Thank you for your attention!
