

THE INVOLVEMENT OF THE TERRITORY

Črtomir Kurnik, LEAG, Slovenia

30th March 2022

LEAG

Founded in 2009 with the support of 18 Gorenjska municipalities.

We advise municipalities, individuals and companies on energy concepts, strategies for the use of renewable energy sources and in the preparation of legally required documents.

Empowering Energy and Climate Action Plans SECAPs in a wide crossborder area

SECAP GORENJSKE

SECAP Gorenjska was presented on April 10, 2019.

Under SECAP option 2 - a group of municipalities registered as one signatory

Milestones:

- determination of the base year 2005*
- identification of areas for mitigation and adaptation*
- establishing partnerships for the implementation,*
- confirmation from all 18 reginal municipalities*

SECAP GORENJSKE

MITIGATION

- *municipal buildings,*
- *residential buildings,*
- *public lighting,*
- *transport*

ADAPTATION

- *forestry,*
- *tourism,*
- *traffic.*

COUNCIL OF SECAP GORENJSKA

Start in March 2020

16 Members ~ representatives: government, faculties, municipalities, energy distributors, forest service, tourism boards, regional development agencies...

COUNCIL OF SECAP GORENJSKA

The tasks of the council are:

- *addressing issues in the field of SECAP,*
- *making suggestions and guidelines,*
- *giving professional assessments of implemented activities,*
- *performing other tasks for implementation determined by SECAP Gorenjska.*

Four focus areas:

1. *Public awareness and promotion of energy and climate change.*
2. *Improving air quality.*
3. *Establishment of the Center for Renewable Energy Sources, Energy Efficiency and Climate Change.*
4. *Energy poverty.*

GREEN SCHEME OF SLOVENIAN TOURISM

BOHINJ | SLOVENIJA
Turizem in goštevstvo, Slovenija

Things to do | What to see | Information | Events | Shop

THINGS TO DO

Bohinj can be enjoyed in all seasons and in all weathers. We will welcome you with open arms - in our own way, to make you feel special. But our priority will always be to preserve the Alpine idyll.

ALL | WINTER | SPORTS | EXCURSIONS | FAMILIES

Bowling

For those who want to brighten up an afternoon or evening, spend an active rainy day or are just looking for fun, Bohinj ECO Hotel, with its own live bowling lanes, is the right choice for both adults.

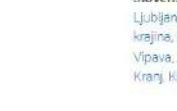

Ice skating

Ice skating is an exciting and elegant winter activity, especially great for family time outdoors. Two pairs of sharp blades, good balance and gloves, and you're ready to set up on the ice.

Snowshoeing

Experience the charm of a snowy landscape with an ancient way of walking on snow. As well as a good cardiovascular workout, you'll experience lots of great views, well-ventilated lungs and some well-deserved hot chocolate.

Winter hiking

If you are experienced enough, have checked the weather forecast, have chosen a safe route, are in good shape, and have good equipment that you know how to use, you may still want to venture.

Sledding

A playful descent down a snowy slope. A very simple experience in the fresh winter air that will put a big smile on the face of the little.

Hiking

For hiking enthusiasts, Bohinj, from the lowlands to the highest peaks, is an inexhaustible source of ever-new adventures. There is

Fishing in Bohinj

Clean waters and smart fish make for good and interesting fishing. Enjoy unspoiled nature with easy access to fishing spots where

Juliana hike

Juliana hike takes you on a 790-kilometre route around the Julian Alps in 7 stages suitable for long distance cycling.

ENERGY POVERTY

Jesenice, 17.3.2022

Kranj, 7.12.2021

POTENTIAL OF HEAT USE FROM MUNICIPAL WASTEWATER

I. ZARICA MUNICIPAL ZONE

Within the Zarica municipal zone, there are quite a few facilities where the obtained energy could also be used. In the short term, the construction of the administrative building of the company Komunala Kranj d.o.o. is planned. (Zarica Circular Economy Center). The system would be set up at the outlet of the treatment plant, where sufficient quantities and temperatures of wastewater are recorded.

II. KRANJSKA ISKRICA

In the area of the former dairy in Kranj, a housing estate has been planned for several years in accordance with spatial planning documents. The area was bought by the company Iskraemeco, which intends to build a multi-apartment neighborhood Kranjska iskrica in this area with 385 units, some of which will be commercial.

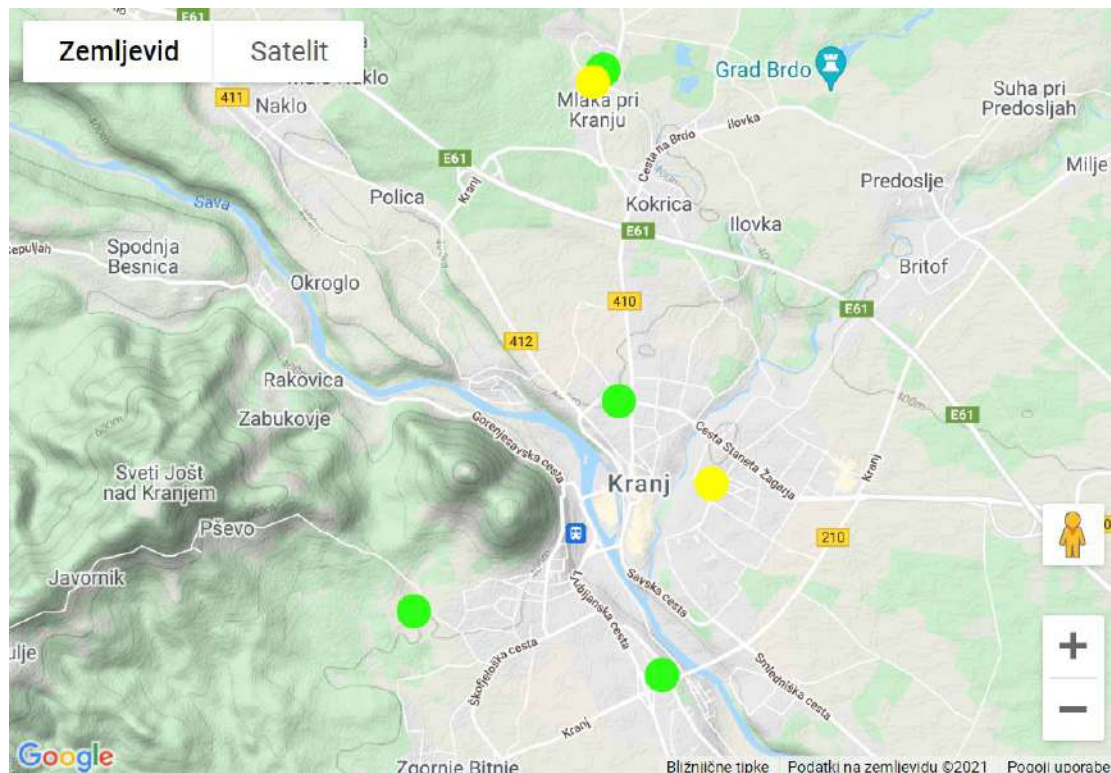

AIR QUALITY MEASUREMENT IN KRANJ

Measurements:

100 CLIMATE-NEUTRAL AND SMART CITIES BY 2030

European Commission

English

Home > News > Commission invites cities to express their interest to become part of European Mission "100 Climate-Neutral and Smart Cities by 2030"

NEWS | 25 November 2021 | Brussels, Belgium | Research and Innovation

Commission invites cities to express their interest to become part of European Mission "100 Climate-Neutral and Smart Cities by 2030"

The Commission launched today a call for expression of interest addressed to cities to join the European Mission on Climate-Neutral and Smart Cities.

The objectives of the mission are to achieve 100 climate-neutral and smart European cities by 2030 and to ensure that these cities act as experimentation and innovation hubs to enable all European cities to follow suit by 2050.

Joining the mission will put the selected cities right at the innovation forefront of the transition towards climate neutrality, as part of the European Green Deal. As the fight against climate change increasingly turns to deployment of solutions, cities are best placed to be the early adopters of the policies to get to climate neutrality. In the process, it will allow them to deliver multiple benefits to their communities in terms of reduced air and noise pollution, less congestion, lower energy bills and healthier lifestyles.

Maryia Gabriel, Commissioner for Innovation, Research, Culture, Education and Youth, said:

"We need cities at the forefront of our efforts to reach climate neutrality. It is great to see the enthusiasm and ambition that many of them have already shared with us. I would like to strongly encourage cities to participate in this Call, not just those that are already far advanced on their journey to climate neutrality, but also those who are in an earlier stage of their transformation."
