

13-17 May 2019 | Bled, SLOVENIA

## Organisers

Sašo Džeroski, *JSI - Jožef Stefan Institute & JSIPS - Jožef Stefan International Postgraduate School, Ljubljana, Slovenia*  
Serena Zacchigna, *ICGEB - International Centre for Genetic Engineering and Biotechnology, Trieste, Italy*

Requests for information directly to:  
[high.content@ijs.si](mailto:high.content@ijs.si)

## Deadline

Deadline applications: 11 February 2019

Registration deadline: 29 April 2019

## Funding

- Participants are expected to pay the registration fee and cover their own travel and living costs.
- A limited number of grants covering full living costs (accommodation and meals) and registration fee waivers will be available for young scientists national of [ICGEB Member States](#) currently residing outside of Slovenia

## Concept

The event will bring together a diverse group of experts covering the different topics of high-content screening, image analysis, chemoinformatics and machine learning. This will allow graduate students, as well as researchers from academia and industry, to familiarize themselves with these highly modern and important topics.

## Topics

- Data Science
- Machine Learning
- Virtual Screening
- Drug Discovery
- High Content Imaging

## Participants

- Students and researchers involved in the field of data science, machine learning, virtual screening, drug discovery and high content imaging
- Researchers from academia and industry
- Two poster sessions will also be organized
