BioApp: Transregional technological platform for transfer of advanced bio- polymers from lab to market

**BioApp Project - Call 1/2016 - Priority
Axis 1 - Specific Objective 1b – ID
BioApp_1472551605**

The BioApp project presented a new strategic collaboration with a cooperative action of the complementary and interdisciplinary partners from neighboring regions, which reflected in a joint development of high added value products and services. The new

Trieste, Italy), public and private research institutes (COBIK, Centre of Excellence for Biosensors, Instrumentation and Process Control, Ajdovščina, Slovenia, and NIC, National Institute of Chemistry, Ljubljana, Slovenia), Biopolife and a medium-sized enterprise (Acies Bio d.o.o., Ljubljana, Slovenia), aiming to provide an integrated solution that combines natural resources and human wellbeing. All project partners benefited from the pilot technology development, by means of strengthening links and synergies among enterprises, research and development centers and the higher education sector.

Creating value together.

Our wide range of expertise allows us to approach new challenges and research projects with a unique lens and provide unique synergies for you and your company. Biopolife can become a key partner in the development and implementation of your next research project.
